Continuation of 2. NOTE: Newly added limitations "wherein the linkage service comprises an intermediary service routine between the calling program and the callee program" would require further consideration and very possibly further search..

Continuation of 5. does NOT place the application in condition for allowance because: Applicant's arguments were not persuasive. First, Applicant's phrasing of different register widths does not over come the rejections based upon the 370 and 390 systems, which clearly through differing addressing modes have differing register widths. Second, new limitations have been addressed above. All other arguments have been addressed in previous office action response..
